SUMMARY

NLP researcher focused on low-resource and multilingual language processing, particularly Bangla. Developed a two-stage ASR pipeline using fine-tuned Whisper and BanglaT5 to recognize regional Bengali speech and standardize dialectal expressions. Co-authored research on class-imbalanced hate speech detection, diglossic register classification, and transformer-based question generation. Research interests include low-resource NLP, speech processing, multilingual NLP, and endangered language preservation.

RESEARCH INTERESTS

- **Low-Resource NLP & Dialectal Speech Processing:** Building transformer-based pipelines that combine fine-tuned ASR with sequence-to-sequence text normalization to convert dialectal and regional speech into standardized text. The work focuses on resolving register and standardization inconsistencies across low-resource, dialect-rich languages.
- **Endangered and Minority Language Preservation:** Developing data curation, annotation, and modeling approaches for underrepresented and minority languages that lack large-scale digital resources, with the goal of extending NLP and speech technologies to communities currently excluded from mainstream language tools.

EDUCATION

Bachelor of Science in Computer Science and Engineering *Spring 2022 – Fall 2025*

Daffodil International University, Dhaka, Bangladesh

- Final Year Thesis: “A Two-Stage Framework for Dialectal Bengali ASR and Standardization using Whisper and BanglaT5”, supervised by Amit Chakraborty Chhoton, Assistant Professor, DIU. Built a two-stage pipeline across ten regional Bengali dialects: a fine-tuned Whisper model for dialectal speech recognition, followed by a fine-tuned BanglaT5 model to normalize the output into standard Bengali, along with a rule-based post-processing component to correct context-dependent errors (e.g., informal/formal register confusion) that limit accessibility of digital services for regional speakers.
- CGPA: 3.68/4.00

WORK EXPERIENCE

Talent Acquisition Specialist, Flowmingo AI *March 2026 – Present*

- Partnered with technical leadership to identify research-minded engineers and operators; structured interviews and candidate experience aligned with a fast-moving AI product team.

REVIEWER EXPERIENCE

ACM Transactions on Asian and Low-Resource Language Information Processing (TAL-LIP)

Certified Peer Reviewer – Invited reviewer for manuscript evaluation, methodology soundness, and clarity of contribution in Asian and low-resource language NLP.

Progress in Artificial Intelligence (PRAI), Springer Nature

Certified Peer Reviewer – Invited reviewer for manuscript evaluation and analysis.

6th International Conference on Electrical, Computer, Communications and Mechatronics Engineering (ICECCME 2026), Bali, Indonesia 2026

Certified Peer Reviewer – Invited as a reviewer for the conference’s technical program covering the latest technologies and applications.

PROJECTS

Regional Bangla ASR & Standardization Framework *Undergraduate Thesis*

- Developed a two-stage pipeline using OpenAI Whisper and BanglaT5 for dialectal speech-to-text.
- Addressed “standardization bias” in low-resource Bangladeshi regional dialects.
- *Skills:* NLP, Speech Processing, Transformers, Python, EDA.

IoT-BD E-Commerce Platform

- Built a full-stack IoT product management web application using Flask, JavaScript, and CSS.
- Implemented OOP principles for modular backend architecture and responsive UI.
- *Skills:* Flask, Python, JavaScript, Web Engineering.

VOLUNTEERING EXPERIENCE

Take Off – Programming Contest Organization

- Coordinated problem sets, judge workflows, and contest logistics to run fair, engaging competitive programming events for students.

Unlock the Algorithm – Contest Operations & Outreach

- Supported outreach, participant onboarding, and day-of operations to grow the local algorithms community and mentorship pipeline.

AWARDS AND SCHOLARSHIPS

Academic Merit Scholarship, Daffodil International University

2022 – 2025

- Awarded a 70% tuition waiver for seven consecutive semesters based on superior academic standing.
- Maintained a CGPA of 3.68/4.00, meeting rigorous renewal criteria reserved for top-performing students in the Department of CSE.

Top Performer, Industry-Collaboration Seminar, DIU Data Science Club

2023

- Achieved first place in a competitive technical assessment during an industry-led seminar focused on real-world data science applications.

TECHNICAL SKILLS

- **Machine Learning & NLP:** Natural Language Processing (NLP), Speech-to-Text (ASR), Transformer Architectures (Whisper, T5, BERT), Sequence-to-Sequence Modeling, LLM Fine-tuning.
- **Deep Learning Frameworks:** PyTorch, TensorFlow, Keras, Hugging Face Transformers, Scikit-learn.
- **Programming & Scripting:** Python, SQL, PHP, C++.
- **Data Science & Analysis:** Exploratory Data Analysis (EDA), Audio Processing (Librosa), NumPy, Pandas, Matplotlib, Seaborn.
- **Research Tools & Platforms:** Git/GitHub, Google Colab, Hugging Face.
